Projects

PocketCA | GITHUB

Jun 2026 – Jul 2026

- Engineered an AI-powered Indian Tax Assistant using Generative AI (LLM) to deliver accurate responses on income tax, deductions, exemptions, and tax regulations, reducing manual research time for users.
- Architected and implemented Retrieval-Augmented Generation (RAG) pipeline with document processing, semantic/vector search, and prompt engineering to ensure contextually accurate, up-to-date tax guidance.
- Developed an interactive conversational UI/chatbot enabling real-time, natural-language Q&A on complex taxation topics, improving user accessibility to tax information.

Resume Analyzer | GITHUB

Mar 2026

- Built an AI-powered talent discovery platform using SBERT semantic embeddings to extract resume entities and rank candidates against job-specific skill requirements.
- Constructed end-to-end resume parsing and gap analysis (PyPDF2, NLTK) to extract skills, experience, and certifications, distinguishing critical technical gaps from partial semantic matches (e.g., Flask vs. Django proficiency)
- Delivered an interactive Streamlit dashboard with Plotly visualizations (radar charts, leaderboards, skill heatmaps) and auto-generated interview protocols with contextual "red flag" hints for recruiters.

Training

Generative AI Essentials | CipherSchools | CERTIFICATE

Jun 2026 - Jul 2026

- Completed hands-on training in Generative AI, Large Language Models (LLMs), prompt engineering, NLP, embeddings, and Retrieval-Augmented Generation (RAG), with a focus on building practical AI applications.
- Implemented vector-based document retrieval with ChromaDB and embeddings, integrating LangChain workflows to enable context-aware responses across document-based AI applications.
- Created Pocket AI, a document-based AI chatbot capable of processing PDF, DOCX, TXT, and CSV files and answering questions using document context and Mistral AI.
- Formulated PocketCA, an AI-powered Indian Tax Assistant, applying LLMs, contextual retrieval, prompt engineering, and conversational AI to simplify complex tax-related queries.

Certifications

- | | |
|---|----------|
| PyTorch DeepLearning.AI Link | Sep 2026 |
| Generative AI Applications IBM Link | Jul 2026 |
| Google AI Professional Google Link | Jul 2026 |
| Prompt Engineering Vanderbilt University Link | Jul 2026 |
| Machine Learning Educative Link | Jun 2026 |

Technical Skills

Languages :	Python, Java, C, C++, SQL
AI/ML :	Machine Learning, NLP, Generative AI, LLMs, Prompt Engineering, RAG, Embeddings, Supervised Learning, Unsupervised Learning, Neural Networks
Libraries/Frameworks :	Scikit-learn, PyTorch LangChain, LangGraph, Llamaindex, Seaborn, Pandas NumPy, Streamlit, Gradio
AI/LLM Tools :	Hugging Face, ChromaDB, Vector Databases
Developer Tools :	Git, Github, VS Code, Google Colab, Jupyter Notebook, Linux
Databases :	MySQL, PostgreSQL

Education

Lovely Professional University Punjab

Since Aug 2024

Bachelor Of Technology – Computer Science and Engineering
CGPA: 8.85

Punjab, India

Sarti Devi Public School

Apr 2022 – Mar 2023

12th with Science — Percentage: 92.00%

Delhi, India
